

Product Labeling for Microsoft Dynamics AX

COMPLIANCE LABELING

Industry compliance label requirements include AIAG, FDA, DoD, major retailers, & more.

SETUP & CONFIGURATION

Create Label designs, Link AX data to the label design, Link printers to label designs, enable automatic processing if desired, Easy to maintain for new product lines, product changes and new customers.

OPERATION

For automatic labels simply check the processes by label design that should be automated and have high quality product labels, specific to your items and customers, print as Dynamics AX transactions are processed. Greatly increasing efficiency and reducing costs.

AXLABEL automatically generates product labels within Dynamics AX.

Create compliant product labels while processing standard AX transactions or on demand.

Easy setup and configuration of label formats satisfy any industry requirement.

Integrating Bartender, or equivalent, label software with Dynamics AX gives companies with product label requirements a solution that can be easily setup, maintained, operated, and audited. Options to automatically create labels based on standard AX transactions for Sales Order Picking, Purchase Order Receiving, and Production Order Processing allow efficient labeling and facilitate reduced costs associated with other labeling processes.

Create any label format, for any product, and any customer or base your labels on groups of items and customers.

Optionally keep an audit trail of the labels generated and the related AX transaction.

SYSTEM REQUIREMENTS

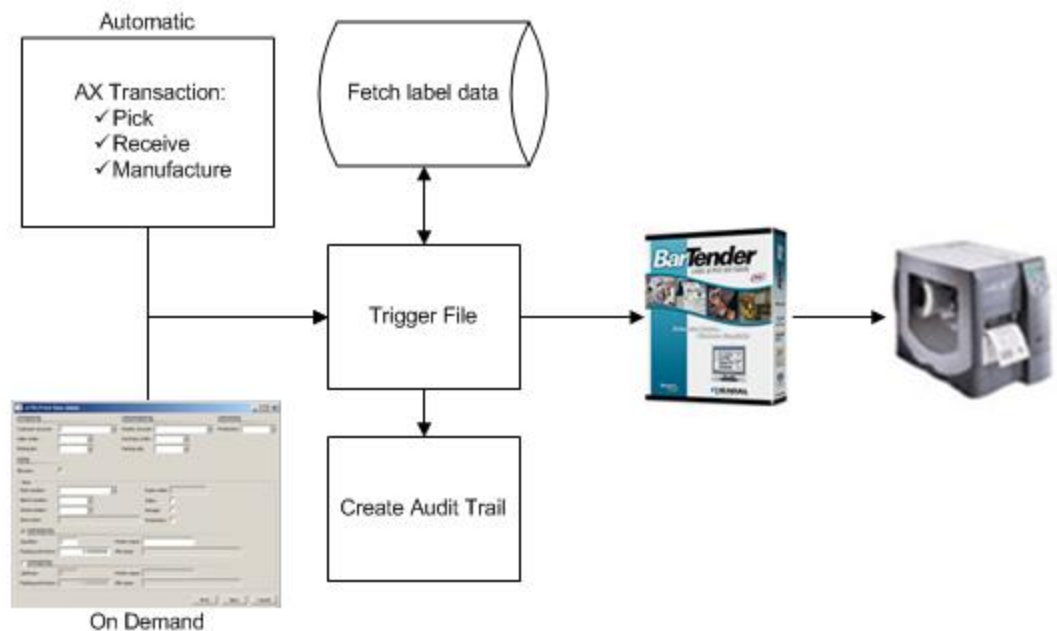

- ✓ Dynamics AX v4
- ✓ Dynamics AX 2009
- ✓ Network shared label printer(s)
- ✓ Shared network folder
